Washington, D.C. 20505

27 February 1986

Mr. Arthur Sabin

Dear Mr. Sabin:

I am responding to your letter of 21 February 1986 to [redacted] wherein you requested a 90-day extension to the 24 February 1986 due date for comments on the most recent Traffic Advisory Committee (TAC) meeting minutes. Since the last TAC meeting on 29 January 1986, I have assumed the responsibility for the Agency's New Building Project Office and concurrently the chairmanship of the TAC.

In response to concerns expressed by Mr. Maxfield at the 29 January TAC meeting, the Virginia Department of Highways and Transportation (VDH&T) has tasked its design consultant, Dewberry & Davis, with performing the preliminary design and analysis of one additional Option #2 alternative. Dewberry & Davis has also been tasked with the development of several additional berm-treatment alternatives. This data should be available for review in the next several weeks, at which time we intend to make it available to member organizations of the TAC. We will shortly thereafter call for a special meeting of the TAC to review all design alternatives for Option #2 so that member organizations have the opportunity to express their design preferences.

While we understand your Association's process and appreciate the concerns expressed in your 21 February letter, we regret that we are unable to accommodate a 90-day extension as you have requested. We hope to be in touch with each member of the TAC within the next 30 days or so as stated above. Please be assured that we will continue to do everything we can to accommodate concerns expressed by both the McLean Citizens Association and the Ad Hoc Committee for Travel To/From the CIA.

Sincerely,

[redacted]
Chairman, CIA Traffic Advisory Committee

Dear Mr. Moran:

In your letter of 10 Feb 86 to Mr. Kent Maxfield you requested comments on the design, landscape, and signage plans of the 123/193 intersection be provided to you by 24 Feb 86. We cannot meet your date and request a 90 day extension.

Mr. Maxfield's Ad Hoc committee requested the Transportation Committee of the McLean Citizens Association to examine and assess these documents. Our preliminary examination provided more questions than answers, and the lack of a quorum inhibited either acceptance or rejection. We will present them to our Board of Directors Wednesday evening, at eight o'clock, 5 March 86.

Sincerely,

Arthur C. Sabin, Chairman
Transportation Committee

CC: Mr. Kent Maxfield
Mrs. Gloria Adams, Pres.
McLean Citizens Assn.
